

GREAT HEART SEED

GT-3909ES

Late Group III

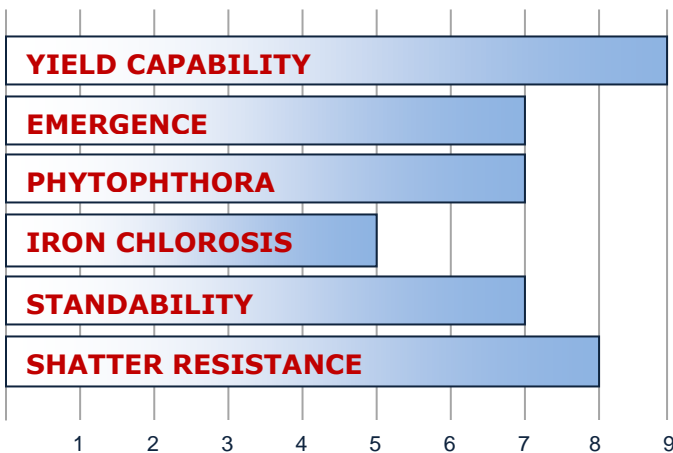

GT-3909ES is a wide-body line, which really helps in stress situations because its complete canopy helps conserve soil moisture. That combined with the Enlist® herbicide program does a great job controlling weeds too. We pick up some great phytophthora resistance in this line that helps when planted in more water saturated prone soils.

KEY STRENGTHS

Winning yield records
Cyst, phytophthora and Stem Canker resistance
Great width and canopy coverage
Enlist® herbicide tolerant for tough weed control

MANAGEMENT TIPS

Plenty of yield to run with anything with some durability bred in
Take advantage of the solid canopy for drought and weed control
Good choice for wet feet
No need to over-populate
