

# GREAT HEART SEED

# HT-5509

95 DAY

GENETIC GROUP - U

## KEY STRENGTHS

- Very adaptable to various environments
- Strong disease package includes Goss and Gray Leaf
- Great standability season-long
- Very good ear flex
- Durable under drought

## MANAGEMENT TIPS

- Great pick for fields with multiple soils
- The hybrid covers the major diseases in its region
- Strong standability throughout the season
- Works under many different populations

## HERBICIDE TOLERANCE

- GROWTH REGULATORS ●
- PIGMENT INHIBITORS ●
- SULFONYLUREA'S ▼

**HT-5509** is a hybrid that has no known weaknesses. If you want to pull the population back and use it as a stress corn it works, if you want to push it on better soils for top yields it works, if you want to make big tonnage on an early hybrid it works. It has the agronomics, trait options and disease package to be that versatile.
