

GREAT HEART SEED

HT-7105

GENETIC GROUP - U

KEY STRENGTHS

- Very high top end yield potential
- Very good standability and greensnap tolerance
- Excellent drydown
- Solid disease package for most concerns
- Can handle wet feet

MANAGEMENT TIPS

- Excellent choice to maximize yield potential
- Very good standability season long in both roots and stalks
- Hybrid dries down well but has great husk cover
- Keep populations moderate and above
- Consider a fungicide in high rust environments

HT-7105 takes high yields to another level. It has very good roots and stalks along with greensnap tolerance, which aids standability the entire season. The disease package offers strong protection for most situations. With this much yield potential and great drydown, it's a hybrid that must be planted.
