KEY STRENGTHS

Stable hybrid with exciting top-end yield
Very good drydown
Good ear flex
Good standability

MANAGEMENT TIPS

Consider it first for high yield situations
It can handle variable soils while performance remains high
Dependable during stress
Works at many population settings
Has dual purpose capabilities

VALUE ADDED TRAIT OPTIONS

VT2P and SS

HT-7234 A hybrid that makes you happy in high and low yield potential situations. It can reach new yield records on even the best of soils but still handle the drought of the tougher acres. You can push the population if you want or cut it back if you need to. It will respond to higher management but doesn't require it.
