

# GREAT HEART SEED

# HT-7244

112 DAY

GENETIC GROUP - U

## KEY STRENGTHS

- Huge area of adaptation
- Different genetic set
- Good ability to perform at various populations
- Excellent stalks, roots and green snap tolerance
- Good under stress and for high yield

## MANAGEMENT TIPS

- Pairs with other high yielding hybrids and spreads genetics
- Can't beat its standability
- Has the yield levels to be your best
- Ear flexes easily at lower populations
- Stands great under high populations
- Not for corn-on-corn applications

**HT-7244** Excellent yield punch with incredible standability all season long. The disease tolerance includes Northern and Southern Corn Leaf Blights, Southern Rust and Goss' Wilt, while the husk cover protects grain quality. The ear flex allows lower populations as the lodging resistance supports high populations. The genetic diversity helps it spread risk on your farm when companioning it with other high performing Great Heart hybrids.
